We are Brick Visual. A creative manufacture specialized in high-end architectural visualization.
Brick Visual is one of the leading European archviz companies, growing from a handful of people to a team of 40 professionals in just 4 years time.

Our ultimate goal is to put architecture on display in an atmosphere that best communicates the identity of the building and in a picturesque style that draws upon classical cinematography.

Virtual Reality
Our vision is to provide our clients with high-end architecture visualization that not only displays the buildings photorealistically, but also communicates the design and speaks to the audience.

We do that by combining our expertise of advanced 3d modeling and visionary art directing. Thanks to our flexible workflow and smart international business developers, we have no geographical limitations when it comes to an exciting project to work on.
In order to achieve all this, we constantly invest in values that are important to us, such as lifelong learning, high standards and an open creative community. The Brick workshop and inhouse expert mentor program, conferences, outdoor-, sports- and cultural events are just a few of the activities that help our people to grow and excel. What makes us connected is the dedication to architecture, design and technology.
The sequel of our 2016 Showreel, the B-Side gives a glimpse into our working methods and life at the brick office.
RESIDENTIAL
"Brick Visual has added an extra dimension to our marketing program that has enabled us to communicate our vision for a space to tenants and investors in a novel, high quality format. They can see and feel the space. Brick Visual’s attention to detail, professionalism and communication made them easy to work with and the end product was nothing short of impressive!"

Savanna Real Estate Investment & Development Firm
“They have an exceptional team of professionals on board, who delivered well beyond our expectations. Not only did they provide us with the striking visualization pieces that we are currently using across all of our marketing platforms, but their seamless service and attentive communication has made the entire relationship smooth and enjoyable.”

Silverstein Properties
OXFORD STATION, UK | Architect: AHR Architects | 1st prize at competition
I would like to thank you and your team for the hard work as we truly appreciate the exceptional service and talent executed on this project. We are incredibly happy with the result, you have done a phenomenal job.

Quadrangle Architects Ltd.
"Congrats for the images. Honestly awesome work! We know we have a good project."

BakPak Architects
“You guys are really impressive folks! Love this. This will change how we are talking about this building.”

Works Partnership Architecture
‘THE OPAL’ HEADQUARTERS OF IDA, DK | Architect - Dorte Mandrup Arkitekter | 1st prize at competition
“...I must commend you – this is a beautiful image and my expectations have already been exceeded even with more changes forthcoming.”

GREENBOX STUDIO

Having an in-house greenbox studio gives tremendous freedom in the creative direction: now we can flexibly add real characters to the scenes, thus making every movie and still even more realistic and personalized.
VIRTUAL REALITY

We offer our visualizations in Virtual Reality as well. The combination of spatial experience and built-in design options gives endless opportunities in terms of presenting the potentials of a project. Thanks to our VR application, it is simple to use and easily accessible.
